Outfall ID	Receiving Water	System Vulnerability Factors
---------------	-----------------	------------------------------

Where SVFs are:

1. History of SSOs, including, but not limited to, those resulting from wet weather, high water table, or fat/oil/grease blockages.
2. Sewer pump/lift stations, siphons, or known sanitary sewer restrictions where power/equipment failures or blockages could readily result in SSOs.
3. Inadequate sanitary sewer level of service (LOS) resulting in regular surcharging, customer back-ups, or frequent customer complaints.
4. Common or twin-invert manholes serving storm and sanitary sewer alignments.
5. Common trench construction serving both storm and sanitary sewer alignments.
6. Crossings of storm and sanitary sewer alignments.
7. Sanitary sewer alignments known or suspected to have been constructed with an underdrain system;

ANNUAL REPORT -2020-2021
EASTON PUBLIC WORKS DEPARTMENT

The Easton Public Works Department continued in its efforts to maintain and improve the 94.41 miles of roads and in caring for other department responsibilities.

The department's duties include: snow and ice removal during the winter season; street sweeping; pot hole repairs; roadside mowing; guide rail repairs; installation and repair of street and traffic signs; tree and brush removal; installation and repair of curbing; and maintaining Town bridges, pavement preservation, road paving, drainage installation, and catch basin cleaning.

Though the department is a much varied and capable unit dealing with many facets of road construction, repair and maintenance, the department is most always in people's minds when snow and icy roads occur. Easton had a total of 47.5" inches of snowfall, which required the Department to plow on 9 different occasions. Salting of the Town roads occurred 20 times consuming 1290 tons of salt in the process.

The Public Works Department's spring and summer months are used to prepare roads that will be involved in the Town's chip sealing program for that year. Included in the preparation of the roads are brush cutting, grading back the road edges, removal of boulders from under the existing pavement, patching of these holes, installation of any needed drainage or repairs to existing drainage, crack sealing of existing pavement, sweeping of the road and the application of a leveling course of hot mixed asphalt to maintain proper drainage, which leads to the application of hot liquid asphalt and then covered with a layer of 3/8" Trap Rock. The program comes to its completion about a month later when the excess stone is swept up. During the past year, 8.7 miles of road was involved in this program, with the use of 43,841 gallons of road oil.

This past year the department's drainage program entailed:

- 1 New precast manhole
- 5 Catch basins were repaired or rebuilt
- 27 Feet of 6" Perforated PVC under drain pipe installed
- 120 Feet of 15" R.C.P. storm drainage pipe installed
- 96 Feet of 48" R.C.P. storm drainage pipe installed

The department takes care of all street and traffic control signs on the Town's roads. This past year saw 24 new signs and 19 posts installed and 22 signs repaired and reset.

A section of Judd Road, from Skyline Drive south to 222 Judd Rd and from Rocky Ridge Rd south to Route 59 were upgraded by installing additional and rebuilding catch basins, installing additional storm drainage pipe, and the pavement base was reclaimed and overlaid with hot mix asphalt. Drainage work was preformed on Delaware Rd. Town crews

Reconstruction of the South Park Avenue Bridge #04213, by Riverside Lane began in May 2021. A State LOTCIP Grant funded 100% of the construction. The Bridge is on schedule to be completed November 2021

This year's projects include the removal of the 10,000-gallon UST oil tank from the south side of the building at 660 Morehouse Rd and the installation of a new steam boiler on the north end of the building. DPW also retrofitted Town buildings for covid safety such as hands-free soap and sanitizer dispensers and well as plexy glass partitions in office areas.

The Town's crew continued scheduled work with the bucket truck to render needed attention to dead trees and hazardous limbs hanging over the Town roadways. The Emerald Ash Borer has decimated the Town's Ash trees which required removal. The Town's crew removed 214 trees this year. The tree work was done in unison with the Town Tree Warden. The crews were also used the bucket truck to maintain the Town's parking lot lights.

The Town purchased a new grapple with various attachments.

Applications for 44 driveway permits and 20 road-opening permits brought in \$2,550 in fees.

The department continued the maintenance responsibility of the former Samuel Staples School, now known as 660 Morehouse Rd. along with working outside of the Public Works Department which accounted for over 1735.25 hours of work throughout the Town in unison with the Park and Recreation Department, Board of Education, Town Hall, Library, Easton Police Department, Animal Control, EMS and the Conservation Commission.
