

# EASTON CONNECTICUT

Introducing your FoodCycler Pilot Program, proudly supported by the Town of Easton. This innovative program marks the beginning of our town's organics diversion initiative.

In partnership with Food Cycle Science Corporation, residents of Easton will have the opportunity to pilot an on-site food waste diversion solution that will reduce food waste at the source, limiting what is heading to our landfill. The town is offering exclusive pricing for FoodCycler™ machines.

## Available models and pricing:

### FC-30

- **2.5L Capacity** - ideal for 1-2 person household
- 4-8 hour cycle

**\$249**+shipping

### ECO 5

- **5L Capacity** - ideal for 3-5 person household
- 6-9 hour cycle

**\$369**+shipping

The FoodCycler becomes a permanent addition to your household, and we kindly request participants to track their diverted food waste over the 12-week pilot period, contributing valuable data to shape our future waste management strategies.

### Purchase your FoodCycler:
