

# STORMWATER MANAGEMENT PLAN

## 2015-2025

Approved by the Board of Selectmen  
on 12/15/2014

Page 1 of 10

MS4 General Permit  
 Town of Easton 2023 Annual Report  
 New MS4 Permittee  
 Permit Number GSM 000108  
 [January 1, 2023 – December 31, 2023]

---

This report documents the Town of Easton's efforts to comply with the conditions of the MS4 General Permit to the maximum extent practicable (MEP) from January 1, 2023 to December 31, 2023.

**Part I: Summary of Minimum Control Measure Activities**

**1. Public Education and Outreach (Section 6 (a)(1) / page 19)**

**1.1 BMP Summary**

BMP	Status	Activities in current reporting period	Measurable goal	Department / Person Responsible	Due	Date completed or projected completion date	Additional details
1-1 Implement public education and outreach		Post BMP on Town's website.	YES	Dir. D.P.W.	Jul 1, 2019		See 2016 Stormwater Annual Report
1-2 Address education/ outreach for pollutants of concern*		Storm Water posters are posted at the Public Works facility for the public to see.  Brochures are located at Town Hall, Land Use Office and Library has new bookmarks at the front desk printed for 2018	YES  YES	Dir. D.P.W.	Jul 1, 2019		See 2016 Stormwater Annual Report  See photos

Figure 1 LOCATED ON WALL AT PUBLIC WORKS FACILITY

Figure 2 LOCATED ON WALL AT PUBLIC WORKS FACILITY

**1.2 Describe any Public Education and Outreach activities planned for the next year, if applicable.**

Stormwater 2017 Management Plan can be found on the Town website along with Annual Reports for 2017, 2018, 2019, 2020, 2021, 2022 and 2023

**1.3 Details of activities implemented to educate the community on stormwater.**

<b>Program Element/Activity</b>	<b>Audience (and number of people reached)</b>	<b>Topic(s) covered</b>	<b>Pollutant of Concern addressed (if applicable)</b>	<b>Responsible dept. or partner org.</b>
---------------------------------	--	-------------------------	---	--

## 2. Public Involvement/Participation (Section 6(a)(2) / page 21)

### 2.1 BMP Summary

BMP	Status	Activities in current reporting period	Measurable goal	Department / Person Responsible	Due	Date completed or projected completion date	Additional details
2-1 Comply with public notice requirements for the Stormwater Management Plan	Done		Yes	D.P.W. Bruce E. Bombero, Sr., P.E.L.S.	Apr 3, 2017	March 31, 2017	See 2016 Stormwater Annual Report
2-2 Comply with public notice requirements for Annual Reports 45 days prior to annual report			Yes	D.P.W.	Feb.15,2024	Feb.15,2024	Feb. 15, 2024 on Town's Website
Household Hazardous Waste Collection	On Going	Will post notice	Yes	D.P.W.		In Fairfield citizen 2/15/2024 Oct 7, 2023	
Electronics recycling	On Going	Will post notice	Yes	D.P.W.		No electronics recycling day in 2023	

### 2.2 Describe any Public Involvement/Participation activities planned for the next year, if applicable.

Bookmarks are available to the public at the front desk in the Library. Brochures on BMP are displayed at the Department of Public Works and at the Easton Town Hall by the Building and Zoning Offices. Also, on the Easton website in a section for SPECIAL ITEM DISPOSAL; PAINT, HOLIDAY TREES, HAZARDOUS WASTE, OIL AND ANTI-FREEZE AND DISPOSAL OF ELECTRONICS.

### 2.3 Public Involvement/Participation reporting metrics

Metrics	Implemented	Date	Posted
Availability of the Stormwater Management Plan-announced to public	Y	2/15/24	Town Clerk's Website – eastonct.gov

### 3. Illicit Discharge Detection and Elimination (Section 6(a)(3) and Appendix B / page 22)

3.1 BMP Summary	Status	Activities in current reporting period	Measurable goal	Department / Person Responsible	Due	Date completed or projected completion date	Additional details
<b>BMP</b>							
3-1 Develop written IDDE program				D.P.W., Health Dept.	Jul 1, 2019		See 2016 Stormwater Annual Report
3-2 Develop list and maps of all MS4 stormwater outfalls in priority areas			YES	D.P.W.	Jul 1, 2020		See 2016 Stormwater Annual Report
3-3 Implement citizen reporting program				D.P.W.	Jul 1, 2017		
3-4 Establish legal authority to prohibit illicit discharges				D.P.W., Health Dept.	Jul 1, 2019		See 2016 Stormwater Annual Report
3-5 Develop record keeping system for IDDE tracking				D.P.W., Health Dept.	Jul 1, 2017		See 2016 Stormwater Annual Report
3-6 Address IDDE in areas with pollutants of concern				D.P.W.	Not specified		See 2016 Stormwater Annual Report

### 3.2 Describe any IDDE activities planned for the next year, if applicable.

As catch basins are cleaned and illicit discharges are discovered they are reported to a supervisor. The town will then take action to remove the discharge from entering the waterways.

**3.3 List of citizen reports of suspected illicit discharges received during this reporting period.**

Date of Report	Location / suspected source	Response taken
None		

**3.4 Provide a record of illicit discharges occurring during the reporting period and SSOs occurring July 2012 through end of reporting period using the following table.**

Location (Lat long/ street crossing /address and receiving water)	Date and duration of occurrence	Discharge to MS4 or surface water	Estimated volume discharged	Known or suspected cause / Responsible party	Corrective measures planned and completed (include dates)	Sampling data (if applicable)
11 Sport Hill Parkway	Unknown	Mill River	Septic System in R.O.W. 10' from U Drain	Previous owner installed septic system without a permit.	Oct. 2017. Removed septic system and relocated to rear of property.	
11 Sport Hill Parkway			Septic System within 75' of stormwater. infiltrators		Owner removed infiltrator connection to c. b. in April of 2020	
12 The Circle	unknown	Mill River			Test up stream to find discharge point	3/16/2023
23 Newman Drive		Mill River		Health dept. said not from septic system	Reported to health dept. 12/2023	12/7/2023
51 Blanchard Road		Mill River		Health dept. said not from	Reported to health dept. 12/2023	12/7/2023

septic system

**3.5 Briefly describe the method used to track illicit discharge reports, response; to those reports, and who was responsible for tracking this information.**  
When catch basins are cleaned, if any discharge into basin that has a smell is referred to a supervisor. When the Town workers sweep the road or do repairs, any illicit discharge is reported to a supervisor.

**3.6 Provide a summary of actions taken to address septic failures using the table below.**

Location and nature of structure with failing septic systems	Actions taken to respond to and address the failures	Impacted waterbody or watershed, if known
--	--	---

Septic System at 11 Sport Hill Parkway located too close to U drain.	The Health Dept. was notified. A new septic system was installed and old one removed.	The Mill River
--	---	----------------

**3.7 IDDE reporting metrics**

**Metrics**

Estimated current actual number of MS4 outfalls	# 361
Estimated current actual number of interconnections	#
Outfall mapping complete	100%
Interconnection mapping complete	0%
System-wide mapping complete (detailed MS4 infrastructure)	0%
Outfall assessment and priority ranking	0%
Dry weather screening of all High and Low priority outfalls complete	# 0

Catchment investigations complete

# 0

Estimated percentage of MS4 catchment area investigated

0%

Maps of outfalls are available at public works. Working on putting maps on line.

**3.8 Briefly describe the IDDE training for employees involved in carrying out IDDE tasks including what type of training is provided and how often is it given (minimum once per year). Public Works employees are trained to report any illicit discharge as they work on sweeping the roads and repairing catch basins and curbing. Have employees read illicit discharge sheets once a year. Add sheet to road work and C.B. cleaning work duties.**

## 4. Construction Site Runoff Control (Section 6(a)(4) / page 25)

### 4.1 BMP Summary

BMP	Status	Activities in current reporting period	Measurable goal	Department / Person Responsible	Due	Date completed or projected completion date	Additional details
4-1 Implement, upgrade, and enforce land use regulations or other legal authority to meet requirements of MS4 general permit. New Regulations Adapted	Adopted June 17, 2019.			Planning & Zoning	Jul 1, 2020	Adopted June 17, 2019	
4-2 Develop/implement plan for interdepartmental coordination in site plan review and approval	The Town has been doing this since 2005	We currently review site plans	Yes since 2005	P & Z, Town IWWC, Town Eng.	Jul 1, 2017	Ongoing since 2005	
4-3 Review site plans for stormwater quality concerns	Has been done		Since 2005	P & Z, IWWC, Town Eng.	Jul 1, 2017	Since 2005	
4-4 Conduct site inspections	Ongoing Site Inspection	With development of property	Since 2005	P & Z, IWWC, Town Eng.	Jul 1, 2017	Since 2005	
4-5 Implement procedure to allow public comment on site development	On going		Since 2005	P & Z, IWWC, Town Eng.	Jul 1, 2017	Since 2005	See 2016 Stormwater Annual Report
4-6 Implement procedure to notify developers about DEEP construction stormwater permit	On going		Since 2005	P & Z, IWWC, Town Eng.	Jul 1, 2017	Since 2005	See 2016 Stormwater Annual Report.

**4.2 Describe any Construction Site Runoff Control activities planned for the next year, if applicable.**

1. One drainage crossing at 25 Pond Road to be upgraded to add more pipes to reduce flooding over the roadway, silt bags will be used to control silt from dewatering.
2. Construct new detention basin on South Park Ave. at Tersana Drive ,install silt fence to control silt runoff from the site.

**5. Post-construction Stormwater Management (Section 6(a)(5) / page 27)**

**5.1 BMP Summary**

<b>BMP</b>	<b>Status</b>	<b>Activities in current reporting period</b>	<b>Measurable goal</b>	<b>Department / Person Responsible</b>	<b>Due</b>	<b>Date completed or projected completion date</b>	<b>Additional details</b>
5-1 Establish and/or update legal authority and guidelines regarding LID and runoff reduction in site development planning	Adapted June 17, 2019.		YES	Planning & Zoning	Jul 1, 2022	Effective June 17, 2019	
5-2 Enforce LID/runoff reduction requirements for development and redevelopment projects			YES	P & Z Commission	Jul 1, 2022	Effective June 17, 2019	
5-3 Identify retention and detention ponds in priority areas	Completed	Done	YES	P & Z, Dir. D.P.W.	Jul 1, 2020	Jan. 2005	On going
5-4 Implement long-term maintenance plan for stormwater basins and treatment structures	On going	On going	YES	D.P.W., Town Eng.	Jul 1, 2020	Jan. 2005	
5-5 DCIA mapping					Jul 1, 2020		

5-6 Address post-construction issues in areas with pollutants of concern	On going	New development and new house construction	P & Z, Enforcement Officer, D.P.W.	Not specified	Jan. 2005
--	----------	--	------------------------------------	---------------	-----------

**5.2 Describe any Post-Construction Stormwater Management activities planned for the next year, if applicable.**

Test more in areas of concern in dry weather.

**5.3 Post-Construction Stormwater Management reporting metrics**

**Metrics**

Impervious surface area in town		Approx. 3.5% to 4% of land area
Baseline (2012) Directly Connected Impervious Area (DCIA)	14.1% developed	2,580 acres
DCIA disconnected (redevelopment plus retrofits)		NEW DETENTION POND 28 AC TO BE ADDED TO DETENTION ON South Park Ave
Retrofits completed		DETENTION POND STARTED IN 2022
DCIA disconnected		1.19% AFTER DETENTION POND FINISHED
Estimated cost of NEW DETENTION POND		\$8,200
Detention or retention ponds identified		IN 2022 /# total 22+1 NEW POND = 23

**5.4 Briefly describe the method to be used to determine baseline DCIA.**

The town has two zones a one acre zone and a three acre Zone. Town employees will visit the one acre zone and determine the houses that have DCIA and determine if it can be removed from the towns drainage system.

## 6.1 BMP Summary

BMP	Status	Activities in current reporting period	Measurable goal	Department / Person Responsible	Due	Date completed or projected completion date	Additional details
6-1 Develop/implement formal employee training program			On Going	Dir. D.P.W.	Jul 1, 2019		
6-2 Implement MS4 property and operations maintenance			On Going	Dir. D.P.W.	Jul 1, 2018		
6-3 Implement coordination with interconnected MS4s			On Going	Dir. D.P.W.	Not specified		
6-4 Develop/implement program to control other sources of pollutants to the MS4			On Going	P & Z, Dir. D.P.W.	Not specified		See 2016 Stormwater Annual Report
6-5 Evaluate additional measures for discharges to impaired waters*				Park & Rec. Dir.	Not specified		Please refer to BMP 6.13, Parks and Open Space. Please refer to BMP 6.14, Pet Waste Management and BMP 6.15, Waterfowl Management.
6-6 Track projects that disconnect DCIA				Dir. D.P.W.	Jul 1, 2017		Track DCIA coverage annually, identify sites eligible for the 5-year "look back" credit, and develop a written retrofit program by July 1, 2020, with a goal by reducing overall DCIA by 2% by July 1, 2022
6-7 Implement infrastructure repair/rehab program	On going			Dir. D.P.W.	Jul 1, 2021		

6-8 Develop/implement plan to identify/prioritize retrofit projects	Dir. D.P.W., Town Eng.	Jul 1, 2020	Identify required repairs, and keep an inventory of required repairs, and document when repairs have been made.
6-9 Implement retrofit projects to disconnect 2% of DCIA		Jul 1, 2022	1.19 % disconnected after detention pond on South Park Ave. is finished.
6-10 Develop/implement street sweeping program	Dir. D.P.W.	Jul 1, 2018	
			On Going
6-11 Develop/implement catch basin cleaning program	Dir. D.P.W.	Jul 1, 2020	
			On Going
6-12 Develop/implement snow management practices	Dir. D.P.W.	Jul 1, 2018	The Town shall develop and implement a written snow and ice management plan, including protocols for staff training and record maintenance and updated standard operating practices. The Town shall also document in its Annual Report the results of its snow removal program, including details on methods, materials used, lane-rails treated, staff training, program changes, and snow disposal methods.
			On going

The town shall continue to follow existing optimization procedures for the application of fertilizers and proper disposal of grass clippings and leaves for Town-owned and operated facilities. Optimization practices considered may include:

- Conducting soil testing and analysis this Spring to determine soil phosphorus levels;
- reduction of fertilizers where applicable
- use of alternative fertilizer forms (products with reduced, slow-releasing or insoluble phosphorus compositions)
- proper storage and application
- application schedule and timing (to minimize runoff potential)

We have also established practices for the proper disposal of grass clippings and leaves, either composted or appropriately disposed

6.14 Pet Waste Management

Park & Rec. Dir.

March 2023

- 1) The town of Easton estimates we have approximately 1500 pounds of dog waste disposed of per year, in our town dumpster.
- 2) We have one Dog Park located at 306 Sport Hill Road, Easton CT. There are dog park rules posted and a waste station providing pet waste baggies and a disposal area. In the other locations in town where dogs are allowed (ON LEASH ONLY) there is signage posted reminding residents to pick up after their pets and keep dogs off fields.
- 3) We will also be adding additional waste receptacles at our PAINE Open Space, Morehouse Park and Aspetuck Park locations.

6.15 Waterfowl Management

Park & Rec. Dir.

March 2023

- 1) The town of Easton will identify lands where waterfowl congregate and will monitor. To raise awareness regarding the water quality impacts, we will install signage or use other targeted

techniques to educate the public about the detrimental impacts of feeding waterfowl (including the resulting feces deposition) and discourage such feeding practices

2) We have and will continue to plant misc. plants around our two locations, to deter waterfowl from congregating, also using green lasers to encourage waterfowl to leave locations.

**6.2 Describe any Pollution Prevention/Good Housekeeping activities planned for the next year, if applicable. Screen areas above 105 Wedgewood Drive for e Coli Bacteria to find the source of pollution.**

**6.3 Pollution Prevention/ Good Housekeeping reporting metrics**

**Metrics**

Employee training provided for key staff

Y  
B. Bantle, 2007  
K. Schwartz, 2009  
M. Alves, 2011

Street sweeping

Curb miles swept

118.44 miles

Volume (or mass) of material collected

549.5 cuyd

Catch basin cleaning

Total catch basins in priority areas

633

Total catch basins in IMS4	1770
Catch basins inspected	516
Catch basins cleaned	516
Volume (or mass) of material removed from all catch basins	233 cu.yd.
Volume removed from catch basins to impaired waters (if known)	0 tons
Culvert cleaned in various areas of Town	
<b>Snow management</b>	
Type(s) of deicing material used	Salt
Total amount of each deicing material applied	348.5 tons of salt
Type(s) of deicing equipment used	Trucks with sanders
Lane-miles treated	752.16 lane miles
Snow disposal location	Shoulder of roads
Staff training provided on application methods & equipment	Yes 12/9/2016
<b>Municipal turf management program actions (for permittee properties in basins with N/P impairments)</b>	
Reduction in application of fertilizers (since start of permit)	4000 lbs or 33%
Reduction in turf area (since start of permit)	0%
<b>Lands with high potential to contribute bacteria (dog parks, parks with open water, &amp; sites with failing septic systems)</b>	
Cost of mitigation actions/retrofits	\$ 400

#### 6.4 Catch basin cleaning program

Briefly describe the method used to optimize your catch basin inspection and cleaning schedule.

New catch basin sheets are used to give more information about the basins noting the following: if new pipe is installed without a permit and if any illegal discharges are evidenced.

#### 6.5 Retrofit program

Briefly describe the Retrofit Program identification and prioritization process, the projects selected for implementation, the rationale for the selection of those projects and the total DCIA to be disconnected upon completion of each project. [Provide information if available in 2017 report. Section to be completed for the 2019 Annual Report.]

Describe plans for continuing the Retrofit program and how to achieve a goal of 1% DCIA disconnection in future years. [Provide information if available in 2017 report. Section to be completed for the 2019 Annual Report.]

Describe plans for continuing the Retrofit program beyond this permit term with the goal to disconnect 1% DCIA annually over the next 5 years. [Provide information if available in 2017 report. Section to be completed for the 2019 Annual Report.]

Part II: Impaired waters investigation and monitoring [[This section required beginning with 2019 Annual Report](#)]

**1. Impaired waters investigation and monitoring program**

1.1 Indicate which stormwater pollutant(s) of concern occur(s) in your municipality or institution. This data is available on the MS4 map viewer: <http://s.uconn.edu/ctms4map>.

Nitrogen/ Phosphorus  Bacteria  Mercury  Other Pollutant of Concern

1.2 Describe program status

Discuss 1) the status of monitoring work completed, 2) a summary of the results and any notable findings, and 3) any changes to the Stormwater Management Plan based on monitoring results.

**2. Screening data for outfalls to impaired waterbodies (Section 6(i)(1) / page 41)**

2.1 Screening data collected under

2017 permit

Complete the table below for any outfalls screened during the reporting period. Each Annual Report will add on to the previous year's screening data showing a cumulative list of outfall screening data.

Outfall ID	Sample date	Parameter (Nitrogen, Phosphorus, Bacteria, or Other pollutant of concern)	Results	Name of Laboratory (if used)	Follow-up required?

**3. Follow-up investigations (Section 6(i)(1)(D) / page 43)**

Provide the following information for outfalls exceeding the pollutant threshold.

#### **4. Prioritized outfall monitoring (Section 6(i)(1)(D) / page 43)**

Once outfall screening has been completed for at least 50% of outfalls to impaired waters, identify 6 of the highest contributors of any pollutants of concern. Begin monitoring these outfalls on an annual basis by July 1, 2021.

<b>Outfall</b>	<b>Sample Date</b>	<b>Parameter(s)</b>	<b>Results</b>	<b>Name of Laboratory (if used)</b>
----------------	--------------------	---------------------	----------------	-------------------------------------

**Part III: Additional IDDE Program Data [This section required beginning with 2019 Annual Report]**

**1. Assessment and Priority Ranking of Catchments data (Appendix B (A)(7)(c) / page 5)**

Provide a list of all catchments with ranking results (DEEP basins may be used instead of manual catchment delineations).

1. Catchment ID (DEEP Basin ID)	2. Category	3. Rank
---------------------------------	-------------	---------

**2. Outfall and Interconnection Screening and Sampling data (Appendix B (A)(7)(d) / page 7)**

**2.1 Dry weather screening and sampling data from outfalls and interconnections**

Provide sample data for outfalls where flow is observed. Only include Pollutant of concern data for outfalls that discharge into storm water impaired waterbodies.

Outfall / Interconnection ID	Screening / sample date	Ammonia	Chlorine	Conductivity	Salinity	E. coli or enterococcus	Surfactants	Water Temp	Pollutant of concern	If required, follow-up actions taken
------------------------------	-------------------------	---------	----------	--------------	----------	-------------------------	-------------	------------	----------------------	--------------------------------------

**2.2 Wet weather sample and inspection data**

Provide sample data for outfalls and key junction manholes of any catchment area with at least one System Vulnerability Factor.

Outfall / Interconnection ID	Sample date	Ammonia	Chlorine	Conductivity	Salinity	E. coli or Enterococcus	Surfactants	Water Temp	Pollutant of concern
------------------------------	-------------	---------	----------	--------------	----------	-------------------------	-------------	------------	----------------------

### 3. Catchment Investigation data (Appendix B (A)(7)(e) / page 9)

#### 3.1 System Vulnerability Factor Summary

For those catchments being investigated for illicit discharges (i.e. categorized as high priority, low priority, or problem) document the presence or absence of System Vulnerability Factors (SVF). If present, report which SVF's were identified. An example is provided below.

Outfall ID	Receiving Water	System Vulnerability Factors
------------	-----------------	------------------------------

Where SVFs are:

1. History of SSOs, including, but not limited to, those resulting from wet weather, high water table, or fat/oil/grease blockages.
2. Sewer pump/lift stations, siphons, or known sanitary sewer restrictions where power/equipment failures or blockages could readily result in SSOs.
3. Inadequate sanitary sewer level of service (LOS) resulting in regular surcharging, customer back-ups, or frequent customer complaints.
4. Common or twin-invert manholes serving storm and sanitary sewer alignments.
5. Common trench construction serving both storm and sanitary sewer alignments.
6. Crossings of storm and sanitary sewer alignments.
7. Sanitary sewer alignments known or suspected to have been constructed with an underdrain system;
8. Sanitary sewer infrastructure defects such as leaking service laterals, cracked, broken, or offset sanitary infrastructure, directly piped connections between storm drain and sanitary sewer infrastructure, or other vulnerability factors identified through Inflow/Infiltration Analyses, Sanitary Sewer Evaluation Surveys, or other infrastructure investigations.
9. Areas formerly served by combined sewer systems.
10. Any sanitary sewer and storm drain infrastructure greater than 40 years old in medium and densely developed areas.
11. Widespread code-required septic system upgrades required at property transfers (indicative of inadequate soils, water table separation, or other physical constraints of the area rather than poor owner maintenance).
12. History of multiple local health department or sanitarian actions addressing widespread septic system failures (indicative of inadequate soils, water table separation, or other physical constraints of the area rather than poor owner maintenance).

### 3.2 Key junction manhole dry weather screening and sampling data

Key Junction Manhole ID	Screening/ Sample date	Visual/olfactory evidence of illicit discharge	Ammonia	Chlorine	Surfactants
-------------------------	------------------------	--	---------	----------	-------------

### 3.3 Wet weather investigation outfall sampling data

Outfall ID	Sample date	Ammonia	Chlorine	Surfactants
------------	-------------	---------	----------	-------------

### 3.4 Data for each illicit discharge source confirmed through the catchment investigation procedure

Discharge location	Source location	Discharge description	Method of discovery	Date of discovery	Date of elimination	Mitigation or enforcement action	Estimated volume of flow removed
--------------------	-----------------	-----------------------	---------------------	-------------------	---------------------	----------------------------------	----------------------------------

**Part IV: Certification**

"I have personally examined and am familiar with the information submitted in this document and all attachments thereto, and I certify that, based on reasonable investigation, including my inquiry of those individuals responsible for obtaining the information, the submitted information is true, accurate and complete to the best of my knowledge and belief. I understand that a false statement made in this document or its attachments may be punishable as a criminal offense, in accordance with Section 22a-6 of the Connecticut General Statutes, pursuant to Section 53a-157b of the Connecticut General Statutes, and in accordance with any other applicable statute."

## Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on December 07, 2023 and listed below. The project was identified as your project: **Stormwater**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Sample and Analysis Qualifiers section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the Sample and Data Qualifiers Relating to This Work Order section of this report and case narrative if applicable.

Please contact Client Services at 203-270-9973 with any questions regarding this report.

### Definitions and Other Information

- Temp\_S2 The samples were delivered directly from the field by the client. Upon receipt, the temperature of the samples exceeded 6 deg. C. Ice was not
- QM-07 The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
- M-DUPS The RPD between the native sample and the duplicate is outside of limits due to sample non-homogeneity
- HT-pH HOLDING TIME EXCEEDED. Samples for pH must be measured in the field or within 15 minutes of sample collection.
- B Analyte is found in the associated analysis batch blank. For volatiles, methylene chloride and acetone are common lab contaminants.
- \* Analyte is not certified or the state of the samples origination does not offer certification for the Analyte.
- MCL The Maximum Contaminant Level (MCL) is the maximum concentration of a chemical that is allowed in public drinking water systems. The MCL is established by the U.S. Environmental Protection Agency (EPA). Some states have MCLs that are equal to or less than the Federally established MCL. The listed MCL value reflects the MCL established by the State where the sample was taken.

### General Notes for N3L0240

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All analyses conducted met method or Laboratory SOP requirements. See the Sample and Data Qualifiers Section for further information.
6. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
7. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

# Hazardous Waste Drop-Off Day Set For Easton Residents

Bring your insecticides, lighter fluids, swimming pool chemicals, oven cleaners, airplane glue, moth balls, septic tank degreasers...

Rich Kirby, Patch Staff

Posted Wed, Aug 30, 2023 at 6:08 pm ET

Only household hazardous waste will be accepted only. Town officials reserve the right to refuse unidentified materials and large amounts and/or commercial hazardous waste. (Shutterstock)

EASTON, CT — In collaboration with the towns of Trumbull and Monroe, Easton residents are welcome to dispose of household hazardous waste during a regional drive-through collection day on Saturday, Oct. 7.

Location: 307 Indian Ledge Park Drive, Trumbull (next to the BMX Facility.)

**TOWN OF  
TRUMBULL  
HIGHWAY DEPT.**

366 Church Hill Rd.  
Trumbull, CT 06611  
(203) 452-5070

November 20, 2023

Mr. Ed Nagy & Jenna Licursi  
Easton Public Works Dept.  
15 Westport Rd.  
Easton, CT 06612

Re: Hazardous Waste Day Billing

Dear Ed & Jenna:

Following is the breakdown for the Town of Easton Household Hazardous Waste Day held in Trumbull on Saturday, 10/7/23. The cost is \$35 for a half household and \$59 for a full household, plus 1/3<sup>rd</sup> of the \$7,872 setup fee and 7.41% of the \$3,120 paintcare fee (\$80/unit):

½ Households	60.59 x \$35	= \$2,120.65
Paintcare fee	7.41 x \$80	= \$592.80
Full Households	84 x \$59	= \$4,956
1/3 of the setup fee		= \$2,624
<b>Total .....</b>		<b>\$10,293.45</b>

If any additional information is required, please feel free to email me or contact me at (203) 452-5071.

Please be advised that Clean Harbors Environmental has been paid. Therefore, please make your check payable to *Town of Trumbull* and remit to the following address:

Trumbull Highway Dept.  
366 Church Hill Rd.  
Trumbull, CT 06611

## NOTICE

The Town of Easton's 2023 draft Annual Report for the Stormwater Management Plan will be available at the Town of Easton, Public Works Facility, 15 Westport Road and on [eastontnct.gov](http://eastontnct.gov) from February 15, 2024 through March 30, 2024 for public comment.

All Town residents, officials, building contractors, and businesses are encouraged to view this document. The Town is complying with Federal and State regulations by applying to the CTDEP Small Municipal Separate Storm Sewer System Permit. In compliance with the permit, the Town has created a Stormwater Management Plan. An Annual Report will be created for each year covered by the permit. These documents are required to undergo a 45 day public review.

**ANNUAL REPORT –2021-2022**  
**EASTON PUBLIC WORKS DEPARTMENT**

The Easton Public Works Department continued in its efforts to maintain and improve the 94.41 miles of roads and in caring for other department responsibilities.

The department's duties include: snow and ice removal during the winter season; street sweeping; pot hole repairs; roadside mowing; guide rail repairs; installation and repair of street and traffic signs; tree and brush removal; installation and repair of curbing; and maintaining Town bridges, pavement preservation, road paving, drainage installation, and catch basin cleaning.

Though the department is a much varied and capable unit dealing with many facets of road construction, repair and maintenance, the department is most always in people's minds when snow and icy roads occur. Easton had a total of 29" inches of snowfall, which required the Department to plow on 6 different occasions. Salting of the Town roads occurred 15 times consuming 885 tons of salt in the process.

The Public Works Department's spring and summer months are used to prepare roads that will be involved in the Town's chip sealing program for that year. Included in the preparation of the roads are brush cutting, grading back the road edges, removal of boulders from under the existing pavement, patching of roads, installation of any needed drainage or repairs to existing drainage, crack sealing of existing pavement, sweeping of the road and the application of a leveling course of hot mixed asphalt to maintain proper drainage, which leads to the application of hot liquid asphalt and then covered with a layer of 3/8" Trap Rock. The program comes to its completion about a month later when the excess stone is swept up. During the past year, 6.39 miles of road was involved in this program, with the use of 40,567 gallons of road oil. The driveway and parking areas at Morehouse Fields were included in this year's chip seal program.

This past year the department's drainage program entailed:

18 Catch basins were repaired or rebuilt  
24 Feet of 12" R.C.P. storm drainage pipe installed  
200 Feet of 48" R.C.P. storm drainage pipe installed

The department takes care of all street and traffic control signs on the Town's roads. This past year saw 18 new signs and 13 posts installed and 21 signs repaired and reset.

A section of Morehouse Rd, from Hoyden's Ln north to 244 Morehouse Rd was upgraded by installing additional and rebuilding catch basins, installing additional storm drainage pipe, and the pavement base was reclaimed and paved with hot mix asphalt. The Tatetuck Brook cross culvert was replaced on Everett Rd.

Replacement of the South Park Avenue Bridge #04213 over the Mill River, by Riverside Lane was completed December 2021. A State LOTCIP Grant funded 100% of the construction.

This year's projects include the reconditioning of the 911 Memorial benches ahead of the 20-year anniversary memorial ceremony on September 11, 2021. The benches were power washed, oiled to prolong their life. The Library benches were also included in this reconditioning project. The partial roof replacement at 660 Morehouse Rd began in in May 2022 and is expected to be completed in fall 2022.

The Town's crew continued scheduled work with the bucket truck to render needed attention to dead trees and hazardous limbs hanging over the Town roadways. The Emerald Ash Borer has decimated the Town's Ash trees which required removal. The Town's crew removed 136 trees this year. The tree work was done in unison with the Town Tree Warden.

The Town purchased a new CAT 309 Excavator with Attachments.

**Applications for 48 driveway permits and 30 road-opening permits brought in \$3,200 in fees.**

**The department continued the maintenance responsibility of the former Samuel Staples School, now known as 660 Morehouse Rd. along with working outside of the Public Works Department which accounted for over 2028.75 hours of work throughout the Town in unison with the Park and Recreation Department, Board of Education, Town Hall, Library, Easton Police Department, Animal Control, EMS and the Conservation Commission.**

**Edward Nagy, P.E. - Director of Public Works/Town Engineer**

**Re: 23 Newman Drive and 51 Blanchard Rd**

Bruce - *E.coli* (*Escherichia coli*) are bacteria commonly found in the environment, foods, and intestines of people and animals. Most strains are part of the normal microbiota of the gut and are harmless or even beneficial to humans. However, *E. coli* is a large and diverse group of bacteria. and while most strains of *E. coli* are harmless, others can make you sick. So, *E. coli* can become a public health concern at different levels, for different situations.

For example, in a drinking water well there should be NO *E. coli* - not necessarily because they are harmful, but they are used as an indicator that other contaminants may be getting into the well and the water supply should be evaluated. In a brook or stream, the public health community considers up to 235 MPN/100 mL as "clean" water. The U.S. EPA and CT-DEEP uses a geometric mean calculation (126 cfu per 100mL and statistical threshold value of 410 cfu per 100 ml measured) to assess recreational water quality for the protection of human health. Again, from a public health perspective, raw sewage would have an *E. coli* count in the thousands, if not tens of thousands.

Mark A.R. Cooper, Director of Health  
Aspetuck Health District

January 10, 2024  
Easton Park & Recreation  
Pet Waste & Waterfowl Management Program

Pet Waste - ONGOING

- 1) The town of Easton estimates we have approximately 1500 pounds of dog waste disposed of per year, in our town dumpster.
- 2) We have one Dog Park located at 366 Sport Hill Road, Easton CT. There are dog park rules posted and a waste station providing pet waste baggies and a disposal area. In the other locations in town where dogs are allowed (ON LEASH ONLY) there is signage posted reminding residents to pick up after their pets and keep dogs off fields.
- 3) We will also be adding additional waste receptacles at our PAINE Open Space, Morehouse Park and Aspetuck Park locations.

Waterfowl Management - ONGOING

- 1) The town of Easton will identify lands where waterfowl congregate and will monitor. To raise awareness regarding the water quality impacts, we will install signage or use other targeted techniques to educate the public about the detrimental impacts of feeding waterfowl (including the resulting feces deposition) and discourage such feeding practices.
- 2) We have and will continue to plant misc plants around our two locations, to deter waterfowl from congregating, also using green lasers to encourage waterfowl to leave locations.

Danielle M. Alves  
Director Easton Park & Recreation

## Illicit Discharge Fact Sheet

### For C.B.Cleaning & Roadwork Operations

#### What is an illicit discharge?

An "illicit discharge" is any unpermitted discharge to waters of the state that does not consist entirely of stormwater or uncontaminated ground water.

#### Are there any exceptions?

The following categories of non-stormwater discharges are allowed if such non-stormwater discharges do not contribute to a violation of water quality standards:

- Uncontaminated groundwater discharges including, but not limited to, pumped ground water, foundation drains, water from crawl space pumps and footing drains
- Irrigation water including, but not limited to, landscape irrigation and lawn watering runoff
- Residual street wash water associated with sweeping
- Discharges or flows from firefighting activities (except training)
- Naturally occurring discharges such as rising ground waters, uncontaminated ground water infiltration (as defined at 40 CFR 35.2005(20)), springs, diverted stream flows and flows from riparian habitats and wetlands.

#### What are examples of illicit discharges?

Examples of illicit discharges include but are not limited to:

- Paint being poured into or near the storm drainage system
- Changing oil or antifreeze over or near a storm structure
- Washing vehicles where the runoff could drain into the storm drainage system
- Illegal cross connections or infiltration from leaks from the sanitary sewer including laundry wash water
- Floor drain discharges from commercial or industrial buildings
- Draining pool water
- Soapy water (waste water) from mopping floors or cleaning carpets dumped into the storm drainage system

#### What is the Town doing about illicit discharges?

The Town has developed an Illicit Discharge Detection and Elimination (IDDE) Program as required by the CT DEEP MS4 General Permit to prohibit and eliminate illicit discharges to the MS4, find the source of any illicit discharges, eliminate those illicit discharges, and ensure ongoing screening and tracking to prevent and/or eliminate future illicit discharges. Residents are encouraged to report incidents of illicit discharges to the Town.
