

**SUBDIVISION / RESUBDIVISION  
APPLICATION PACKET  
EASTON, CONNECTICUT**

Dear Applicant:

This Subdivision/Resubdivision Application Packet has been compiled to help you, the applicant, comply with the Subdivision Regulations and obtain a timely decision on your proposal.

It is the purpose of the Subdivision Regulations to promote with the creates efficiency and economy the coordinated development of the Town of Easton and to promote the public health, safety and general welfare and prosperity of the people of the Town of Easton and to conserve the natural beauties of the Town as a residential and farming community.

In Easton, the subdivision applications are expedited through the Planning and Zoning Commission. State Statutes require that an application receive a decision within sixty-five days of its receipt by the Commission, and frequently in the case of a subdivision, it must be held within sixty-five days of receipt of the application and a decision made within sixty-five days of the close of the hearing.

Because of the increasing demands on Commission and staff time for process and review, the stated process must be adhered to strictly. The Commission can no longer accept additional supporting data from the applicant after the application has been accepted. You will receive a decision on the application based on the initial record you submit with the application. Upon request you may obtain a copy of department comments prior to the public hearing.

If the application is believed to be deficient for any reason, e.g., incomplete application form, failure to provide notices for adjacent property owners, omitted site plan data, it may be denied by the Commission. Applicant can consent to extend time frame for any of the steps, but the total of all extensions together cannot exceed 65 days.

The enclosed items are designed to act as a detailed resource for your use throughout the application process. The packet includes the required forms and checklists as well as directions to obtain supplemental forms and data, as required by the Planning and Zoning Commission. If you have additional questions after reading this packet, the Commission staff is available to help you Tuesday through Friday, 10:00AM to 2:00PM. Please make a note of these times and call the Commission staff at 268-6291 in Town Hall to make an appointment.

STATEMENT OF UTILIZATION OF SOLAR ENERGY  
PLANNING & ZONING COMMISSION  
EASTON, CT

Subdivision (Resubdivision) Title: \_\_\_\_\_

File No.: \_\_\_\_\_ Location: \_\_\_\_\_

Please state in what way the applicant has facilitated or considered the facilitation of passive solar energy techniques which would not significantly increase the cost of housing to the house buyer, after tax credits, subsidies and exemptions. For the purposes of this statement, passive solar techniques mean those site design techniques which during the heating season maximize solar heat gain and storage of heat within a building. During the warmer months, these techniques minimize heat gain and provide for natural ventilation. Site techniques shall include but not be limited to:

- (1) Alignment of streets along an east-west axis;
- (2) Alignment of lot lines along a north-south axis;
- (3) Orientation of structures so that the longest side faces south;
- (4) Location of septic systems on the south side of structure to help insure an area free of accessory structures and major vegetation;
- (5) Maintenance of a "solar setback" zone keyed to the percent grade and orientation of the slope, and
- (6) Location of required open space and parking areas on the south side of structure.

Favorable action on the application of which this statement is a part requires demonstration to the Commission that consideration has been given to the various techniques listed above, using the attachment to this statement. For each technique considered, show the approach or alternate approaches studied, the specific site limitations, and cost considerations. Attach additional sheets as necessary.
