EMERGING TECHNOLOGIES AND THE INTERNET OF THINGS (IoT) Wednesday, May 23 @ 7pm

From the appliances and thermostats in our homes to apps and wearables that track our health and fitness to the vehicles we drive and the streetlights and traffic signals that guide us on the road, smart technologies are becoming increasingly interconnected with our everyday lives. They also have the potential of exposing us to security risks at a personal and business level. Join us for this timely and important topic, presented by Pamela Gupta, President of OutSecure, Inc., and Founder & Chair of the Northeast Annual Cybersecurity Summit. Registration is suggested.
